School Loan List Report (SCHLL1)

April 15, 2007

1.0 NSLDS School Loan List Extract File Layout (SCHLL1)

The *School Loan List (SCHLL1)* The School Loan List Report provides School users with detailed student and loan program type information for the requesting school and timeframe. Users can request a begin and end date for specific loan program types. The report will select loans for a maximum of a one year time period. When selecting the student and loan data to display, NSLDS will query for the loan program type(s) associated with the requesting OPEID code where the Date of Guarantee/Loan Date falls between the begin and end dates provided. The valid loan program type for foreign schools is FFEL. Output results include the student's First and Last Name, SSN and Date Of Birth. Loan information displayed includes Loan Amount, Total Disbursement to date, Loan Type, Loan Date, Loan Period Begin Date and Loan Period End Date. Cumulative totals for the loans selected will be displayed at the end of the report. The formatted report or an extract file and sort order can be specified by the requester. Schools users receive the processed data via the SAIG mailbox associated with the NSLDS User ID requesting this report.

This section contains extract file layouts that list the header, detail, totals, and trailer records for the School Loan List batch request file produced. Each online extract request is used to generate one header record, one or more detail records, one or more detail total records and one trailer record. Each record layout table contains the position, the data element name, description, field format, and length.

School Loan List Header Record Layout

Length = 187

Pos FR	Pos TO	Data Element	Description	Field Format	Len
1	1	Record Type	"0"-Represents Header	Char.	1
